## January Birthstone

January's birthstone is as dramatic and bold in color as the importance of the month itself. It is the first month of an entirely new year, an end to what has gone before and the promise of things to come. No matter how the previous year has treated you, you are suddenly in control of things again. A new chance to be the pilot of your future. The Garnet has long been the stone believed to protect travelers no matter what their journey. A gift of Garnet to a loved one was believed to ensure safe travel and a speedy homecoming.

The first Garnets were mined in Sri Lanka over 2500 years ago. Now it is mined in Africa, Australia, India, Russia, South America, and the United States in Arizona and Idaho.
